AliHasanIbrahim47

Professional Summary

Full Stack Software Engineer with hands-on experience designing, building, and maintaining scalable web applications using **React**, **TypeScript**, **Django**, and **Node.js**. Strong focus on **clean architecture**, **API design (REST & GraphQL)**, and performance optimization. Experienced in containerized environments with **Docker**, **Kubernetes CI/CD pipelines**, and collaborative **Agile** teams. Motivated by building reliable, maintainable software aligned with real business needs.

Professional Experience

LIT — **Tartus, Syria (Onsite)**

Full Stack Software Engineer — *Jan 2025 – Present*

- Designed and developed production-grade full-stack applications using **React** and **Django**.
- Implemented and maintained **RESTful** and **GraphQL APIs**, supporting evolving product requirements.
- Containerized applications using **Docker** and **Kubernetes**, improving deployment consistency and environment parity.
- Contributed to client-facing platforms for **German partners**, focusing on system stability and performance.
- Collaborated in a cross-functional **Agile** team, ensuring clear communication between frontend, backend, and product stakeholders.

Aractech — **Dubai, UAE (Remote)**

Frontend Software Engineer — *Oct 2023 – Dec 2024*

- Developed and scaled complex **React + TypeScript** applications with a focus on maintainability and performance.
- Improved client-side data handling using **Redux Toolkit** and **React Query**.
- Built responsive and accessible user interfaces with **Tailwind CSS** and **Material UI**.
- Integrated frontend features with backend services via **REST APIs** in close collaboration with backend engineers.

Selected Projects

Crosscan – Enterprise Web Platform (crosscan.com)

- Developed scalable **GraphQL APIs** using **Django** to support enterprise data workflows.
- Built interactive dashboards and real-time data visualizations using **React**, **TypeScript**, and **uPlot**.
- Implemented user, company, and location management features following modular design principles.

MOCION – Padel Matchmaking Platform (mocion.io)

- Designed and implemented a responsive frontend for leagues, tournaments, and dashboards using **React** and **TypeScript**.
- Built robust forms using **React Hook Form** and integrated state management with **Redux**.
- Focused on clean component architecture and long-term maintainability.

CLiViE – AI Video Processing Tool

- Contributed to an AI-based system that automatically extracts short clips from long-form videos.
- Developed a modular frontend using **React** and **Material UI**.
- Participated in backend architectural discussions focused on clean architecture and separation of concerns.

University Library Management System

- Built a full-stack library management system using **Next.js**, **TypeScript**, and **PostgreSQL**.
- Implemented authentication and role-based access using **NextAuth**.
- Developed admin dashboards with filtering, search, pagination, and analytics features.
- Integrated **Redis** caching and optimized media handling with **ImageKit**.

Education

Latakia University **Latakia, Syria**

Bachelor of Science in Mechatronics Engineering *Sep 2018 – Sep 2023*

National Center for the Distinguished (NCD) **Latakia, Syria**

High School Diploma – Distinguished Student Program *Sep 2015 – Jun 2018*

- Selected among the top students nationwide after a competitive multi-stage admission process.
- Completed an advanced STEM-focused curriculum.

Technical Skills

Frontend: React, TypeScript, Redux Toolkit, React Query, React Hook Form, Tailwind CSS, Material UI, Ant Design

Backend: Django, Node.js, Express.js, REST APIs, GraphQL

Databases: PostgreSQL, MongoDB, Redis

DevOps & Tools: Docker, Kubernetes, Git, GitHub, CI/CD, Webpack

Programming: JavaScript, TypeScript, Python, C++, HTML, CSS

Engineering Practices: Clean Code, Modular Design, Testable Architectures

Languages: Arabic (Native), English (B2), German (B1)
